

Erasmus plus project French part

We wanted to be a part of this Erasmus project...

- to open our students' minds on the world and particularly on Europe (Poland, Italy and Spain)
- We'd like them to be aware that they belong to something bigger : Europe, by exchanging on their hobbies and learnings with other european pupils.

For the pupils

- For the second year we exchange letters with Polish pupils and it gives more meaning to their learning of English.
- They learn about another culture and it helps them to build themselves as European citizens.
- Moreover, participate in joint projects will make their work more valuable and will provide extra motivation in their learnings.

For the teachers

- As teachers, it would enable us to develop good practices from Poland and the others countries involved and to bring a fresh look at our teaching.
- We are particularly keen on discovering how our fellow teachers manage to include pupils facing disabilities in their classes and schools because it's one of our main challenges.

French meeting

- We'll be happy to present our country, our school and moreover our work with our pupils.
- We hope that our pupils will be proud to exchange with their pairs (letters, emails, videos...) but also to meet teachers from others countries.
